

(in email sent out 1/14/03)

We look forward to meeting with you tomorrow, January 15, 2003 from 1:00 to 4:00 pm to discuss possible SIP measures related to agriculture.

Following a brief introduction by Ms. D'Adamo, we intend to turn the meeting over to the agricultural industry representatives who will then lead a roundtable discussion on air quality measures related to agriculture. We expect the discussion to cover both the short term (less than five years) and the long term (greater than five years). Of particular importance will be the areas of IC engines, farm equipment, CAFOs, pesticides, and agricultural burning. Thank you in advance for participating in this meeting.
